4. LAND OF SKY RPO TAC BUSINESS

Item 4A: Confident Scope and Cost Estimate Milestone (CSCE) Presentation

NCDOT recently introduced a new milestone in project development known as the Certified Scope & Cost Estimate (CSCE). This milestone is documented by what is being called the Project Definition Document (PDD). This step is being introduced to develop clear expectations for each project and enable more trustworthy cost estimates. This milestone is also important because it sets some parameters on what will be part of the project and what will not be part of the project.

Teresa Roabinson, PE, NCDOT STIP Western Region Manager will present on this new milestone in project development.

Staff Recommendations: Information only

Item 4B: LOSRPO Draft FY 2027 PWP

LOSRPO staff has developed the DRAFT LOSRPO Planning Work Program, (PWP). The LOSRPO TCC reviewed the DRAFT PWP at the January meeting and the LOSRPO TAC reviewed and approved the DRAFT PWP at the February TAC meeting. I have received no public comments and no comments from NCDOT TPD. There have been no changes made to the funding categories of DRAFT PWP. Once approved the RPO TAC this will be sent to NCDOT TPD and serve as the official FY 2027 Planning Work Program PWP, for LOSRPO. The DRAFT LOSRPO FY 2027 PWP can be reviewed at the following link. [LOSRPO-DRAFT-FY-2027-PWP](#)

Staff Recommendations: Staff recommend approval of the LOSRPO FY 2027 PWP

Item 4C: Prioritization 8.0 Update

The North Carolina Board of Transportation at their July 2025 meeting adopted the 2026 - 2035 The State Transportation Improvement Program (STIP). The STIP is North Carolina's document that reflects planned transportation investments over a ten-year period. The STIP describes each project, has a schedule for implementation, funding sources, and estimated costs.

NCDOT updates the STIP on a two-year cycle based on projects selected for funding from the NCDOT Prioritization process. This is the process in North Carolina that helps determine the majority of transportation improvements across the State. The process is dictated by the [Strategic Transportation Investments Act \(STI\) 2012](#) and is generally designed to be a data-driven, transparent process to determine what transportation

Meeting Agenda

projects are funded or not. The adoption of the new STIP triggers the beginning to the next Prioritization cycle, **P8.0**.

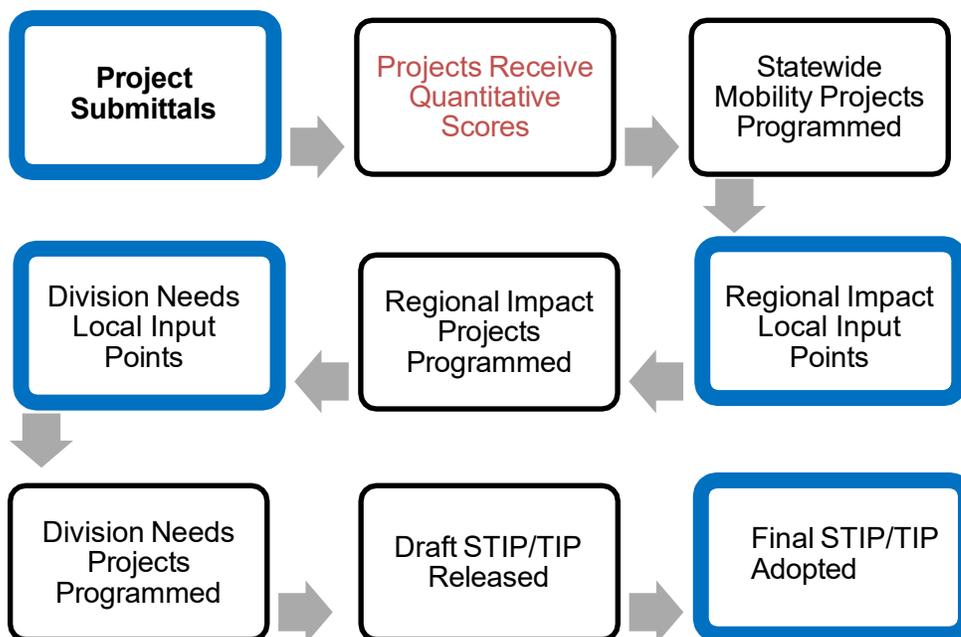

RPO's, MPO's and NCDOT Divisions work with local partners to select projects to be submitted for consideration for funding, (inclusion in the next STIP). Projects from all modes are submitted and will be scored based on the mode, facility type, proposed improvements, and compete for any available funding.

The outcome of Prioritization 8.0, P8.0 will be the 2028 – 2037 State Transportation Improvement Program (STIP).

Projects submitted in the Land of Sky RPO planning area can be RPO submittals, LOSRPO has 11 submittal slots for each mode in P 8.0. Division 13 or 14 submittals, each division get 10 submittal slots for each mode in P8.0. And carryover projects, LOSRPO has no carryover projects in P8.0.

There are several steps in the prioritization process. See the illustration below with RPO tasks circled in **BLUE**: We are currently in Step 2, NCDOT SPOT Office is reviewing and preparing to score projects.

The LOSRPO P8.0 Submitted Project list is available at [LOSRPO Prioritization 8.0 Project List-9-12-25](#)

Local Input Point Methodology

What a Local Input Point Methodology Does

The Local Input Point (LIP) Methodology establishes how the RPO assigns its local priority points as part of North Carolina's Transportation Prioritization (STI/SPOT) process.

The purpose of the LIP is to ensure that:

- Local priorities are reflected in a data-driven, transparent, and defensible way
- Projects are evaluated consistently across jurisdictions and modes
- The RPO meets NCDOT requirements for public involvement and objective and decision-making

The methodology does not replace SPOT scoring; it is a component of the scoring process. The LIP governs how the RPO applies its discretionary points.

The State requirement is that every local input point methodology is required to have at least one quantitative criteria and one qualitative criteria.

Meeting Agenda

What Local Input Points Do

Local Input Points:

Allow RPOs and MPOs to reflect regional and community priorities; provide a mechanism to recognize: Multimodal connectivity and Local safety concerns.

In practice, Local Input Points serve as a policy balancing tool, not a technical rescore tool of projects.

In the prioritization process, funding is split into three different tiers. Local Input Points play a different role in generating a total score for projects evaluated in each tier:

	Quantitative Score	RPO LIPs	Division LIPs
Statewide Mobility	100%	0%	0%
Regional Impact	70%	15%	15%
Division Needs	50%	25%	25%

RPO staff are recommending a small to the local input point methodology.

Currently the Prioritization Score accounts for 50% of the total score and Local Input makes up the remaining 50%. The proposed change would be to incorporate the High Injury Network from the Safe Streets for WNC Plan to Highway and Bike/Ped Projects. Make Local Input 40% of total Score and if a project is on the HIN, it receives 5 points, If the proposed project addresses the safety problem or crash risk it will receive 5 points.

Final RPO Local Input Point Methodologies are due to NCDOT's SPOT office by the end of March.

The Draft RPO LIP can be viewed here [LOS RPO DRAFT SPOT 8.0 Local Input Point Methodology](#)

NCDOT SPOT office has reviewed and approved the changes pending RPO TAC Adoption.

Staff Recommendations:

Recommend LOSRPO TAC approve proposed changes.
