LAND OF SKY RPO TAC BUSINESS

Item 4A: LOSRPO Prioritization 8.0 Draft Regional Impact Local Input Points (LIP) List

NCDOT updates the STIP on a two-year cycle based on projects selected for funding from the NCDOT Prioritization process. This is the process in North Carolina that helps determine the majority of transportation improvements across the State. The process is dictated by the [Strategic Transportation Investments Act \(STI\) 2012](#) and is generally designed to be a data-driven, transparent process to determine what transportation projects are funded or not.

RPO's, MPO's and NCDOT Divisions work with local partners to select projects to be submitted for consideration for funding, (inclusion in the next STIP). Projects from all modes are submitted and will be scored based on the mode, facility type, proposed improvements, and compete for any available funding.

The outcome of Prioritization 8.0, P8.0 will be the 2028 – 2037 State Transportation Improvement Program (STIP).

Land of Sky RPO receives 1200 Local Input Points for both Regional Impact and Division Needs. This round LOSRPO staff recommend flexing 500 LIPs from Regional Impact tier to Division Needs. This is covered by LOSRPO Local Input Points Methodology.

Currently there is more funding available in the Division Needs tier and several lower cost projects at that tier.

Task For Today

- Review Outcomes of Statewide Mobility and Regional Impact Scores
- Discuss DRAFT local input points for Regional Impact projects

Statewide Mobility Projects

Statewide Mobility projects are programmed solely based on the quantitative score. Only one project in the LOSRPO/FBRMPO region that scored well enough for programming with available funding in P8- the **I-40 Managed Lanes project from Exit 44 to Exit 27**. The I-40 Managed lanes project is wholly in the FBRMPO, and this project directly benefits LOSRPO as well as WNC as a whole. The scores for that project and the only other Statewide Mobility projects in the RPO are available below.

Route / Facility / Project Name	From / Cross Street / Location	To / Cross Street	Description	Specific Improvement Type	Cost to NCDOT	Statewide Mobility Quantitative Score (Out of 100)
I-40	Exit 44 (Smokey Park Highway)	Exit 27 (US 23/74)	Construct managed lanes. [TOLL PROJECT]	1 - Widen Existing Roadway	\$ 513,200,000	88.47

Regional Impact Projects

Regional Impact projects are programmed 70% based on quantitative score, 30% on input from planning organizations and NCDOT Divisions. The quantitative scores for eligible Regional Impact projects are below. Including Statewide Mobility Projects that are eligible for cascading. LOSRPO does not recommend cascading any Statewide Projects this round.
